

Rancid CNC Coolant? Use Quantum Silver™

What will this do for Your machine shop?

New way to look at minimizing bacterial growth in CNC coolant tanks. By adding it to existing coolant there are no adverse effects in cutting capabilities or surface finish quality. No more smelly clothes or coolant tanks.

Test Kit Instructions

Step 1. Fill up 32oz container with coolant.

Step 2. Pour the 2oz of **Quantum Silver™** in the 32oz container of coolant.

Step 3. Put lid on jar then shake vigorously.

Step 4. Open and smell the results

Quantum Silver is an all natural nano silver sanitizing agent. Spraying the nano silver creates a micro barrier that continues to kill bacteria.

Our **Quantum Silver** sizes:

-16oz bottle	\$14.95
-32oz bottle	\$24.95
-1 gal refill jug	\$89.00
-5 gal industrial bucket	\$398.00
